

# LED Name Tags!

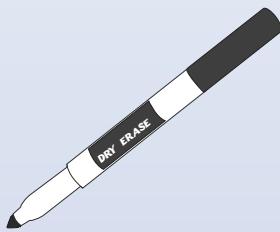

**TIME:**  
5-10 MINUTES

## YOU WILL NEED:

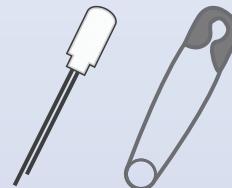

Blank Acrylic Name Tag

Dry Erase  
Marker

Dot Stickers

1 LED

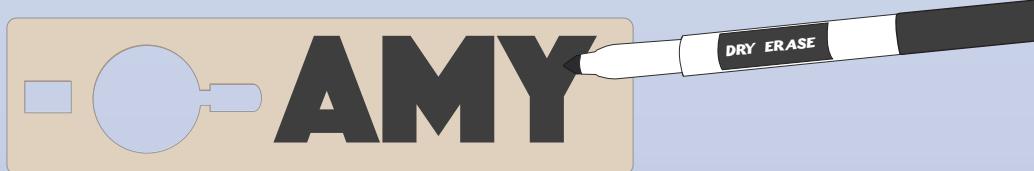

Safety Pin

Battery

## 1 DRAW YOUR NAME or DESIGN

Use a dry erase marker to write your name or design in the blank area. Do not write on the paper backing. Block or bubble letters work best. Curvy lines can be difficult to etch.

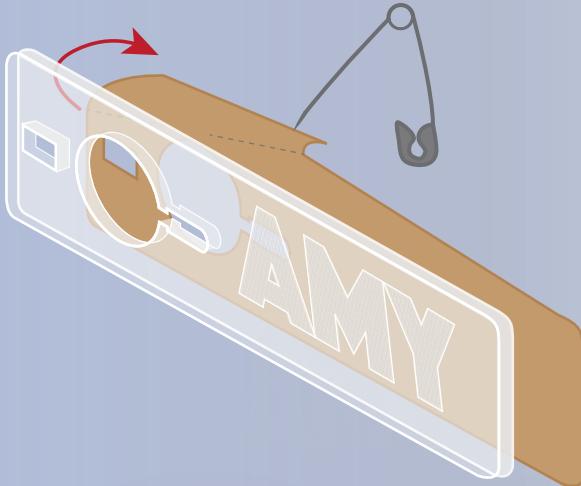

## 2 ETCH YOUR NAME or DESIGN

Use a safety pin to scratch away the dry erase pattern. First etch the outline, then fill in the interior with cross hatching. When finished, erase the remaining dry erase marks.

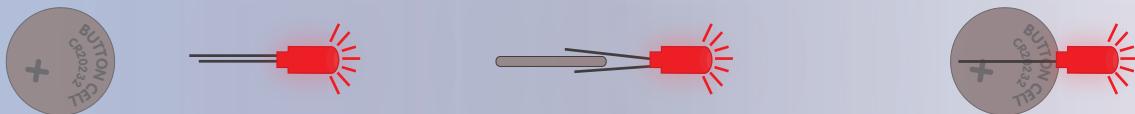

### 3 PEEL PAPER BACKING OFF

With the safety pin lift the edge of the paper of the acrylic name tag starting at an outside corner.

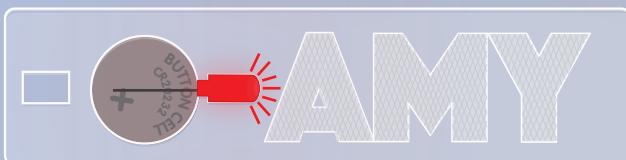

### 4 CONNECT LED AND BATTERY

If the LED does not light up, turn the battery over and try again.

### 5 PUT LED AND BATTERY INTO NAME TAG

### 6 USE STICKERS TO SECURE ON FRONT AND BACK

### 7 ATTACH TO LANYARD OR PIN TO YOURSELF
